DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Election/Restrictions

1. Applicant's election of species b including claims 6-8 in the reply filed on 1/23/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-5, 9-15 are withdrawn from further consideration. The Election/Restrictions requirement is thus made FINAL.

Objections

Regarding claim 7, line 1, the phrase "could be" should be replaced with "is" or an appropriate correction because the phrase "could be" is confusing whether or not the step 4 in claim 6 is simplified.

Allowable Subject Matter

2. Accept for the informality discussed above, claims 6-8 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest a method of utilizing a layer peeling technique to build a spiral inductor having the steps of building a corresponding equivalent circuit model by said reflective and transmissive responses; combining parasitic equivalent circuit elements device and extracting parameters by comparing with said measurement as recited in the independent claim 6 and in combination of the claims.
